

# Multiplication Problems

Can you solve these word problems?

Read the problem carefully, underline the key information, write a number sentence and then write the answer.

1. There are 5 pencils in a pack. Mrs Jones needs 32 pencils for her class. She says, 'I must buy 8 packs.' Is she right? Explain your answer.

Will there be any pencils left over? If so, how many?

2. Mo has 4 bags of marbles with 5 marbles in each. Kyle has 3 bags of marbles with 10 marbles in each. Who has the most marbles?
3. Bananas are 10p each. Priya wants to buy 7 bananas. She has 12 5p pieces. Does she have enough money? Explain your answer.

4. Balloons come in packs of 5 and 10. Sophie has 35 balloons. How many of each pack does she have? Are there other ways to do it?
5. Joe and Salim are sharing some sweets. They have 5 packs of sweets, and once they have shared them they have 15 sweets each. How many sweets are in each packet?
